

Carl Allen Torno
BSIT WMA STUDENT

Profile

I'm Carl Allen Torno, a 19-year-old BSIT student from FEU Institute of Technology specializing in Web and Mobile Applications. I aspire to become a Full Stack Developer, building applications that can make a difference in people's lives. As Walt Disney said, "Keep moving forward," and that's the motto I live by, constantly pushing myself to learn and grow in my field.

Regarding programming, Java, Python, C++, and C# are my jam, but Java is my absolute favorite. I love the challenge of finding solutions to complex problems and bringing my ideas to life through code. I also have experience with web technologies such as HTML, CSS, JavaScript, and React. Aside from programming, I'm also a big fan of anime and sitcoms. I escape reality and immerse myself in different worlds.

Even though I'm introverted to strangers, I'm always open to meeting new people and expanding my horizons. You can call me by my surname, Torno, or Torns. Let's connect and build something unique together.
